

PANDYA SHWETA ATULKUMAR

pandyashweta.in@gmail.com • <https://www.linkedin.com/in/pandyashweta/>

SUMMARY

Multidisciplinary professional with a background in technology, business operations, and design. Holds a Bachelor's degree in Environmental Science and a Master's degree in Information Technology, combining scientific research, analytical thinking, and technical problem-solving. Experienced across software development, e-commerce operations, data analysis, UX/UI design, and website development. Skilled at building practical, scalable solutions and continuously adapting to new technologies through hands-on professional and personal projects. Driven by curiosity and a strong focus on delivering meaningful, results-oriented outcomes.

WORK EXPERIENCE

Technology Strategy & Development Associate (Remote) Jul 2025 – Present
Beyond Labs – California, USA

Managed business operations and supported technology initiatives across internal and client projects. Assisted with product development, documentation, research, and cross-functional coordination. Strengthened UI/UX design skills through hands-on execution while contributing to efficient project delivery.

Assistant (Part-Time) Apr 2025 – Oct 2025
Parth Bus Services – Vadodara, Gujarat

As an assistant to the respective team member, I handled daily data entry tasks, including maintaining, managing, and updating records throughout my tenure. I also worked with software WooCommerce where I helped maintain the product datas and excel work.

Intern (Remote) Sep 2024 – Feb 2025
Innovate2Automate – Bangalore, India

Developed and delivered data-driven software solutions using Java, Node.js, and ImageJ to enhance market analysis and decision-making. I worked with a team of student who worked in this together, we were able to create a simple project to showcase in the web.

PROJECTS

Portfolio - Website

Personal - <https://pandyashweta-portfolio.vercel.app/>

I made a personal website to show off my software development work, my technical skills and my digital art. The website has an easy-to-use design that works on all devices. It shows the things I'm good at, like building software, engineering, running businesses analyzing data doing research and designing. I added links to my GitHub, LinkedIn, Figma and my resume so people can easily find me and see my work.

CORE SKILLS

- **Coding languages:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Vercel Deployment, python
- **Design & Creative Tools:** Figma, Adobe XD, Canva, UI/UX Wireframing, Responsive Design, Adobe
- **Version Control & Workflow:** Git, GitHub, VS Code, Notion, Agile Collaboration
- **Languages:** Hindi, English, Gujarati
